# Helix Core Cloud

Industry-Leading Version Control Hosted by Perforce

Helix Core Cloud is the same industry standard version control trusted by top game studios, entertainment houses, and semiconductor firms — designed for teams under 50 as a managed and hosted offering by Perforce and available through a flexible and affordable monthly subscription.

For only $39/user/month:

- Get a dedicated virtual machine
- Scale users up and down as you need
- No limit on your number of workspaces
- Automatic updates and maintenance-free backups
- 64 GiB storage included (expandable to 32TiB)
- Access to our world-class support

Turnkey, Instant Deployment of Helix Core

When we say turnkey, we mean it. Sign up, select your user count (up to 50 users), and Perforce automatically deploys a Helix Core server for you with:

EXPERTLY PRE-CONFIGURED SETTINGS

Get our applied industry best practices, with no need to configure or maintain your own server. With Helix Core Cloud, all of the server administration is automatically handled by Perforce.

ENTERPRISE-GRADE SECURITY

Keep your teams secure with a dedicated virtual machine, isolated from noisy neighbors. Helix Core Cloud gives you a bulletproof harbor for all of your IP. As a Helix Core Cloud customer, you will get access to our world-class support team when you need it.

NO FUSS SCALABILITY

With Helix Core Cloud, you get an intuitive dashboard that lets you easily add and remove users or expand your storage in just a few clicks. Plus, there is no limit on the number of workspaces you can create.
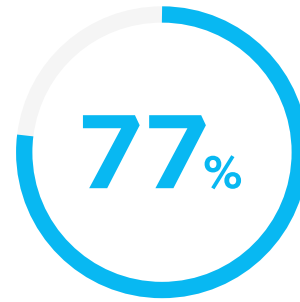

AUTOMATIC UPDATES & BACKUPS

Keep your server optimized with the latest features and security enhancements. With Helix Core Cloud, backups are maintenance-free, and updates are fully managed across your teams with limited downtime.

Why is Helix Core the Industry Leading Version Control?

Whether you're creating a game, movie, digital twin, or other electronic or creative project, the complexity and scale you are working with has never been greater.

Helix Core gives your entire team a single source of truth, enabling you to efficiently manage millions of changes to files across a distributed workforce. It's the only version control system on the market that scales endlessly without sacrificing performance.

77%

77% of survey organizations rated Perforce Helix Core's Reliability as Better compared to other version control tools.

Source: TechValidate survey of 48 users of Helix Core

Teams who need to innovate at scale rely on Helix Core to:

SECURE IP

Securely store IP down to the individual file — including based on the hostname the user is logging in from.

COLLABORATE EFFICIENTLY

Sync and submit large files with ease while avoiding merge conflicts through the use of file locking.

ACCELERATE DEVELOPMENT

Visualize your branching methodology with Perforce Streams.

CONNECT YOUR TOOLS

Version from within your existing tools to keep your teams in their proven workflows.
