

Perforce Software Wins SD Times 100 Award For Third Straight Year

Perforce credited with shaping the software development industry

[ALAMEDA, Calif., June 1, 2006](#) - Perforce Software today announced its inclusion in the 4th annual SD Times 100, a list recognizing the leading and most influential companies in the software development industry.

A winner in the Software Configuration Management and Change Management category, Perforce Software develops Perforce, the Fast Software Configuration Management System, which tracks and manages source code and digital asset development. The SD Times 100 is compiled by BZ Media's SD Times, an IT trade newspaper written specifically for software development managers.

The award citation credited Perforce with its steadfast focus on developing the fastest and most reliable SCM system on the market. "As its competitors look upstream to broader markets, Perforce stays the course and continues to improve performance. It does one thing, but really well."

"The winners of this year's SD Times 100 awards have demonstrated their leadership in shaping the software development industry," said David Rubinstein, Editor-in-Chief of SD Times. "We took into account each nominee's products and services, its reputation among development managers, and the new ideas it brought out. These select individuals and organizations are the ones we've identified as helping to move the art of development forward."

"We are pleased to be included in the SD Times 100 list again this year," said Christopher Seiwald, president and chief technology officer of Perforce Software. "SCM is not a sexy category but it is being recognized increasingly for its critical role in ensuring the successful development of quality software. We are pleased to be named as a leader in SCM."

A complete listing of the SD Times 100 can be found at www.sdtimes.com.

About the Perforce SCM System

Perforce, the Fast Software Configuration Management System, is an award-winning tool that tracks and manages software development for enterprises large and small. Perforce is easy to install, learn and administer; seamlessly handles distributed development, and supports developers across more than 50 operating systems. Perforce ensures development integrity by grouping multi-file updates into atomic changes, enables concurrent development, and intelligently manages multiple software releases using its Inter-File Branching system.

About Perforce Software

Founded in 1995, Perforce Software Inc. develops, markets, and supports Perforce, the Fast Software Configuration Management System. Perforce Software is headquartered in Alameda, Calif., and sells worldwide. The company has international operations in Europe, Japan, and India. In addition to application software companies, Perforce customers represent a broad range of industries including the game development, electronics, pharmaceutical and financial services markets.
