About Perforce Software

At Perforce, we help the world’s innovators ship quality products faster and at unrivaled scale. Our enterprise-class solutions – version control, Git at scale, static code analysis, developer collaboration, and project lifecycle management – unite teams to solve the complex challenges facing modern technology organizations. Since 1996, it’s why Perforce products are trusted by leading brands, including Adidas, Samsung, NVIDIA, Pixar, Salesforce, EA, Ubisoft, and VMware.

**PRODUCTS**

- **HelixCore**
  - Version Control
- **HelixSwarm**
  - Code Review & Collaboration
- **HelixTeamHub**
  - Git Code Management
- **Helix4Git**
  - Git Management at Scale
- **HelixALM**
  - Application Lifecycle Management
- **Hansoft**
  - Agile Project/Product Management
- **HelixQAC/C++**
  - Static Code Analysis

About Perforce Products

Our solutions are designed for organizations – including those in quality-critical industries – that want to deliver products quickly, securely, and at scale using modern methods, including Agile and DevOps.

HelixCore + HelixSwarm

**VERSION CONTROL + CODE REVIEW & COLLABORATION**

Helix Core is a highly scalable, securable version control software that offers an enterprise-wide single source of truth. It versions everything (source code, images, artifacts, etc.) and makes files quickly available for global teams. Integrates directly with Helix Swarm, an enterprise-grade code review and collaboration tool.

HelixALM

**APPLICATION LIFECYCLE MANAGEMENT**

The Helix ALM suite includes modules for different phases of development: requirements management (Helix RM), test case management (Helix TCM), and issue management (Helix IM). Helix ALM provides simple, quick traceability for complex product development.

HelixTeamHub + Helix4Git

**GIT CODE MANAGEMENT + GIT MANAGEMENT AT SCALE**

Helix TeamHub is a Git code management and collaboration tool for scalable DevOps. With Helix4Git, it achieves Git builds and Git clones up to 80% faster. It’s designed for organizations that want to use Git but don’t want to experience pains as their teams, files, or repos grow.

Hansoft

**AGILE PROJECT MANAGEMENT**

Hansoft is an Agile project/product planning and management tool. It helps organizations plan, track, and manage progress – quickly and at scale – while using their preferred delivery methods (Agile, Waterfall, & hybrids).

HelixQAC/C++

**STATIC CODE ANALYSIS**

Helix QAC and Helix QAC++ are static code analyzers for C and C++ programming languages. By checking code for errors as it’s developed, the software ensures quality. It’s prized by customers in highly regulated and quality-critical industries.

INTEGRATIONS

Products include key integrations with industry software such as Jira, Unreal Engine, Microsoft Office, Adobe, Lumberyard, Unity, and many more.

See all of our integrations at perforce.com/integrations

For Faster Workflows

The Perforce portfolio of tools facilitates fast, high-quality product development.
