

PRODUCT BRIEF

Maximize Your Creative Assets

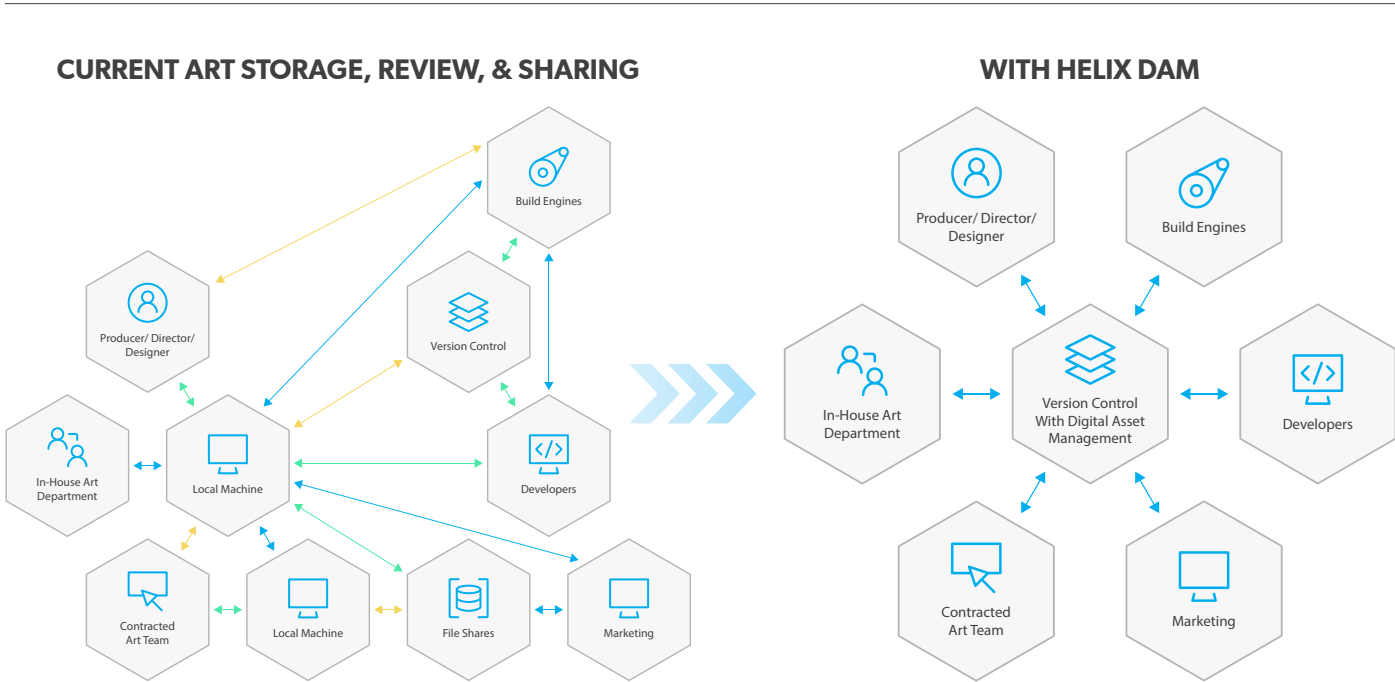

Do more with your art and design team’s creations while streamlining and securing their workflow with Helix Digital Asset Management. Helix DAM — now in Beta — is the most efficient way to store, find, review, share & repurpose all art assets.

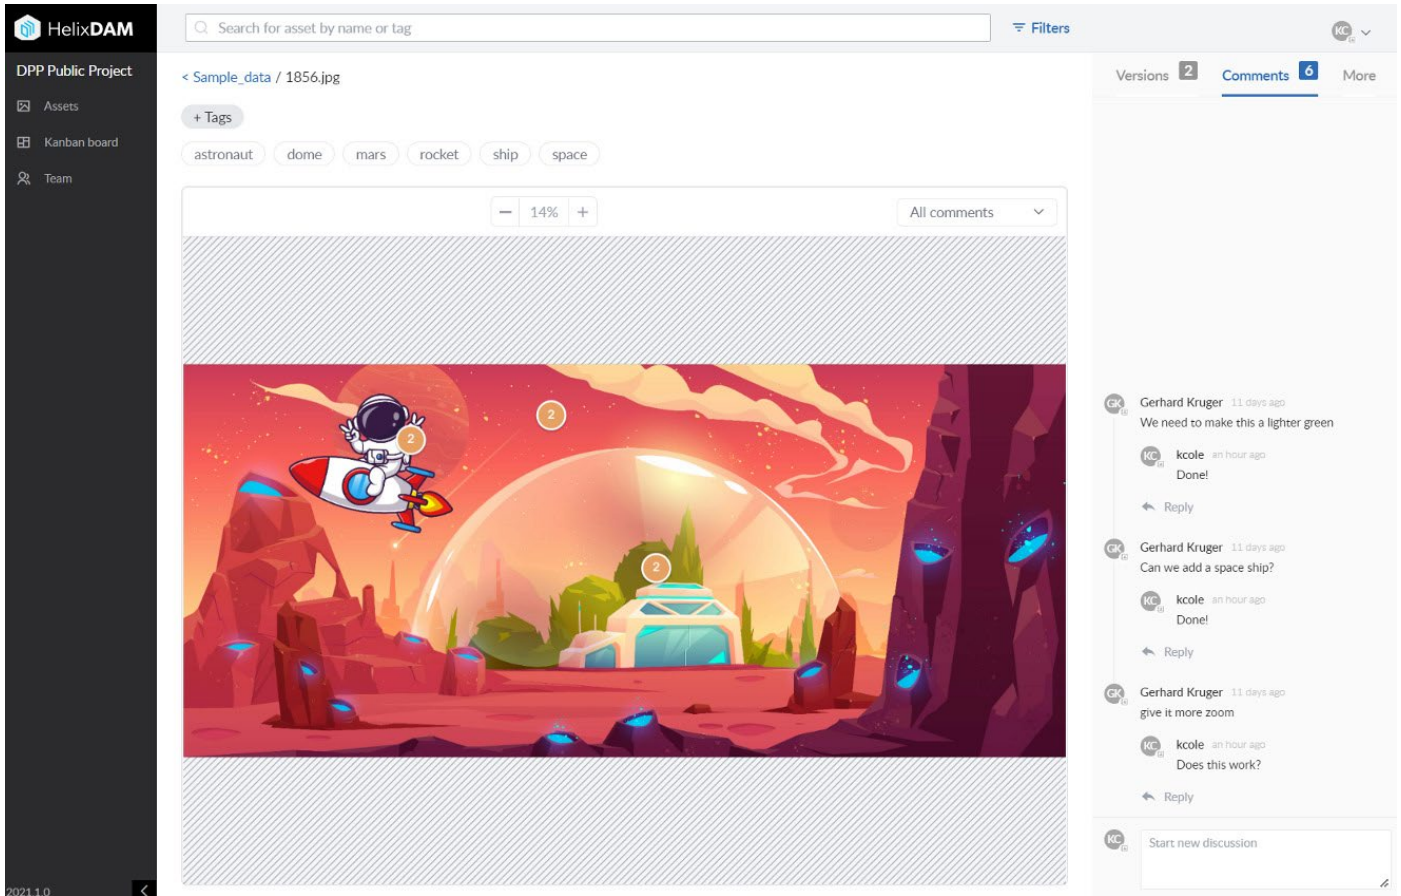

Helix DAM at a Glance

KEEP EVERY ASSET IN YOUR SINGLE SOURCE OF TRUTH

Don’t risk work being lost or overwritten. A simple web interface makes versioning for artists, animators, and designers nearly invisible. Every asset they create will be securely stored, with its history tracked.

MAXIMIZE ASSET REUSE, MINIMIZE WASTED TIME

Stop wasting valuable time recreating assets that already exist because they are too hard to find. Auto-tagging and robust visual searching makes locating any creative asset a breeze.

ACCELERATE & SECURE THE ARTIST FEEDBACK LOOP

Stop reviewing art assets via email or Dropbox. Instead, review them like you would source code. Provide feedback directly on visual assets and quickly see if an asset is in review or approved.

SECURELY & EASILY SHARE ASSETS WITH EXTERNAL PARTNERS

As simple as DropBox with all the protections of Helix Core, Helix DAM Beta lets you securely share a single asset. Permissions can be set at project level or even down to individual files.

Try Helix DAM Beta for Free

Start making the most of your game assets. Sign up for the Helix DAM Beta to try it free.
