

P4 Monitor

Real-Time Visibility into Your P4 Operations

You can't optimize what you can't see. P4 Monitor deploys enterprise-grade monitoring that catches issues before users notice them—giving your team the visibility to maintain peak performance and move from reactive troubleshooting to confident, data-driven operations.

With P4 Monitor, Perforce experts deploy and configure your monitoring environment using proven methodologies:

- **Instrument** - Deploy monitoring across your P4 infrastructure
- **Configure** - Set up dashboards, alerts, and thresholds for your environment
- **Validate** - Verify coverage and alert accuracy
- **Enable** - Transfer knowledge to your team for ongoing operations

Beyond Reactive Troubleshooting

Our P4 experts bring specialized monitoring knowledge with direct access to Perforce product teams, delivering:

- Real-time dashboards and proactive alerting instead of guesswork
- Enterprise-grade metrics collection from day one
- Architecture designed for your specific scale and topology
- Foundation aligned to P4 Maturity Model standards

Key Benefits

- **Proactive Detection:** Catch issues before users notice them with real-time alerting
- **Data-Driven Operations:** Replace guesswork with comprehensive metrics and dashboards
- **Capacity Planning:** Track trends and plan ahead instead of reacting to surprises
- **SLA Confidence:** Meet uptime commitments with the visibility to back them up

Choose Your Implementation Level

	Essential	Standard	Enterprise
Scope	Up to 3 P4 commit servers, centrally accessible	Multi-network environments, additional servers	Complex enterprise environments
Monitoring & dashboards	Core metrics, checkpoint monitoring, base dashboards	All Essential capabilities	All Standard capabilities + custom dashboards
Alerting	Proactive alerting with configurable thresholds	+ Advanced alert management, notification platform integration	+ Custom alert rules, runbook integration
Correlation & analysis	—	Multi-server correlation	+ Structured log analysis, executive reporting
Integration	Standalone	Notification and collaboration platforms	+ Enterprise monitoring stack integration
Advanced Support (Year 1 included)	✓	✓	✓

Advanced Support

Every P4 Monitor deployment includes one year of Advanced Support covering software upgrades and configuration assistance for your monitoring stack. Renew annually at 30% of your initial engagement price to keep your monitoring environment current and fully maintained — or self-manage upgrades using the open-source tooling at no additional cost.

Next Steps

Contact your Perforce account representative to schedule a P4 Monitor deployment. Our team typically begins within 2-3 weeks of engagement, with most environments fully monitored within days of deployment.
